LANGUAGES

English - fluent
Greek - intermediate
Polish - native

INTERESTS

Technology
Interior Design
Writing

INTRO

Hi,

My name is Paulina. I'm 30 and I live in Poland.

I was in awe of my computer, ever since I was a kid. I quickly got bored of games and moved on, to exploring the OS settings and hardware. But it was the internet, our common brain, that got me hooked, for good.

Not confident enough, to attempt programming, I've spent a significant amount of time, working with CMS, WIX etc.

It wasn't for me.

I wanted full control of the project. I wanted to create an experience, from a blank page.

I've made up my mind and started learning, on my own. When I covered the basics, I've attended a full-time, "Front-end developer" course. It was intense and demanding, but it gave me a good idea, of what the job is like and how greatly complex, coding really is.

I couldn't be happier, with a career choice.

When I think about my future in IT, I see a person, very much at place. Excited about her job and the challenges it brings. Eager to learn and deepen her knowledge. Thrilled to be a part, of the ever-changing madness, that IT is, these days.

I'm looking for a remote employment, as a junior front-end developer. When I master Java Script, I plan on becoming full-stack developer, preferably with PHP and Python.
